

# Just how far can your dimes go to save animals?

This program is great for anyone...and it's **FABULOUS FOR KID'S!**

We are hoping to build compassion for animals with a new generation of animal owners who are **committed to their pet for its entire life!**

This is a program aimed at teaching kids the value of money & saving, while also teaching them empathy and compassion for animals!

One 500ml water or soda bottle holds about \$100 in Dimes!  
(an excellent project to teach kids how to selflessly save for a good cause!)

One 2L water or soda bottle holds about \$600 in Dimes!  
(an excellent class or group project for kids! Or lunchroom project at work!)

All funds raised through this program go into the '**Spay & Neuter Program**' and are used to spay and neuter more animals **BEFORE** they even get adopted and leave our shelter.

Your donation helps prevent unwanted litters and more unwanted animals ending up in your local shelter.
